Shuddering shaking from take off through 1st and 2nd gear Feb 1, 2017 — The car was fine on test drive and all yesterday. Tonight I left work and it was really cold. However I doubt cold weather would cause my problem

Car shakes when releasing clutch in first gear - Honda-Tech Apr 6, 2017 — both bad motor mounts/torque mounts and wroned out clutch can make your car shake at take off. check your motors mounts. make sure they are not cracking nor broken. if you see any motor mounts that are going bad or are bad replace all needed and see if its still shakes My car vibrates on the bite point when no gas is given only at Jan 11, 2019 — By not giving the car any throttle and with a fresh new clutch installed, you the ISV might eventually catch up and you may be able to move off You'll experience the same type of effects as driving up a hill in too high a gear. You should apply an amount of throttle before (and as) you release the clutch
